

FROST

is a dynamic ELECTRORIDE cabin vehicle!

As a tricycle, FROST is really agile and easy to manoeuvre and its responsive accelerator lever gives you the ability to start quickly. In addition, the manually operated brakes allow for quick response and great control over the vehicle.

Its compact size makes parking or turning around in the cities much easier.

The color reversing camera undoubtedly helps with this as well. It is a two-seater vehicle, so there is also a place for a passenger behind the driver.

Technical data:

-  1500 W engine
-  maximum speed 45 km/h
-  maximum range 70 km
-  weight including batteries 315 kg
-  maximum loading capacity 218 kg
-  battery set 60V45Ah
-  charging time 4-8 h
-  charging voltage 220-240V
